EURO FLIGHT TEST

Dear Aviators,

EURO FLIGHT TEST is an alliance of category 1 flight test engineers, test pilots and aerospace experts from industry and military with the goal to provide modern and standardized state-of-the-art flight test training and flight test services for the aviation industry and public authorities.

Training and testing at EURO FLIGHT TEST generate high added value for your business while reducing the environmental footprint and your costs significantly.

You can rely on decades of industry and military flight test experience, exceptional efficiency and cutting edge technology. Get your innovations airborne and your mission accomplished – safe, fast and efficient.

*Best regards,
Reinhard Exner
CEO and Chief-Engineer*

FLIGHT TEST TRAINING

FLIGHT TEST SUPPORT

AIRBORNE TESTING

Innovative strength in design, modification and integration of airborne technology is your characterizing feature.

You push the envelope.

A successfully completed flight test program creates confidence in your product for both, customers and airworthiness authorities. EURO FLIGHT TEST can support you in achieving your goals faster and keeping your resources leveled.

Avoid incalculable risks associated with flight tests. Distinguish your flight test program by

- **SAFETY**
- **EFFICIENCY**
- **CONCLUSIVE ANALYSIS**

WORLD WIDE ON AND OFF SITE SUPPORT

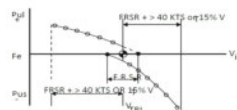

TEST SAFETY
MANAGEMENT

TEST PLANNING

CERTIFICATION
REPORTING

Airworthiness Certification Requirements

EURO FLIGHT TEST provides superb flight test training for **civil** focused customers based on EASA requirements and for **military** customers.

EURO FLIGHT TEST

Our experienced team will gladly **support** you in any phase of your flight test program.

- risk assessment
- program build up
- conducting flight tests
- flight test data analysis
- certification reporting

We take your **innovations airborne**. We rapidly integrate your prototype or production sensor, antenna or camera into a flying testbed.

FLIGHT TEST SERVICES
— WORLDWIDE —

partner of industry

Flight test usually does not offer many attempts to achieve the results you need. A long chain of must-have conditions like financial budget, weather, ground assets, key personnel and other limitations make flight test often come down to a single shot event. Benefit from lessons **we** have learned and make it right the first time. EURO FLIGHT TEST is the first non-governmental flight test training and support center in Europe supporting the aviation industry to meet their ambitious flight test goals fast, safely and efficiently.

partner of public authorities

Supporting manufacturers' innovative strength while ensuring safe operations is a challenging task for certification agencies.

It's good to rely on manufacturer-independent expertise. EURO FLIGHT TEST assists you in the evaluation and assessment of aviation technology, test procedures and compliance reports. We intensively train your staff and keep your certification specialists ahead of the power curve.

EURO FLIGHT TEST

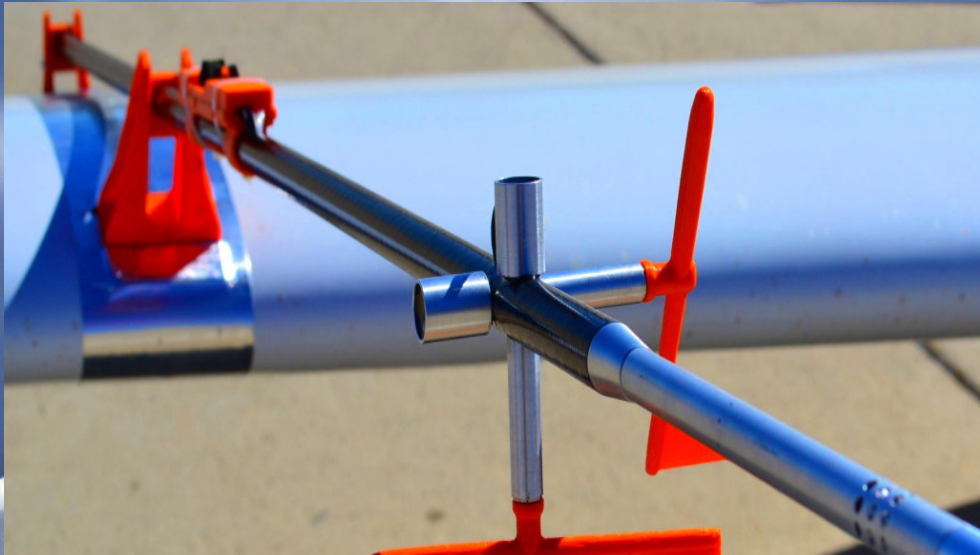

partner of Air Forces

EURO FLIGHT TEST
proudly supports
Air Forces in the
evaluation of aircraft
and aircraft systems.
Our training courses
enable operators
to rapidly build up
testing and
evaluation
expertise.

EURO FLIGHT TEST

NIFTI + WIFI

EURO FLIGHT TEST transforms any light aircraft into a test aircraft. By using a portable **NON INTRUSIVE FLIGHT TEST INSTRUMENTATION** system with WLAN capability, flight test data can be analyzed by a test engineer in real time aboard the test aircraft

EURO FLIGHT TEST

get training • get support • get airborne
